NEXT WASP COURSE: 5-7 March 2018

Malta Life Sciences Park, San Gwann, Malta

Awarded 18 EACCME points www.ithams.com/wasp

What they said in October 2017

It was intense and tiring ... it was unique ... I rarely see so much passion injected in a course. It had a heart and a soul, which to me is inspiring.

!

Thank you for an excellent course. It certainly makes a post grad research degree look much less daunting now! Content was superb but I also enjoyed it - a nice break from wards & outpatients procedures.

No time was wasted in between presentations. Very useful Excel tips. Thank you.

Very helpful and practical information.

Thank you for organizing such a course. ... Now I feel that I have a better understanding. The presentations were great. I am sure it will help me in my masters dissertation!

A very good course. I Should have done it before. I think it should be promoted more to trainees in their early careers. It's nice when you go to a course and come out knowing much more than before you started, company was great too!
